Hi Alayna,

Hope you are well !

It's already been about another 3 1/2 weeks since we last spoke.

I'm more anxious than ever to see your progress and report on the LC review.

I'm providing some updated graphics, tweaked a bit from previous.

The 2-page White Paper can be cited as such (see bottom p.2). It is all from the record, but with my considerable background understanding, synthesis, and interpretation. It tells the story.

I am sharing this piece with elected officials upstream and downstream to try and re-engage the broader stakeholder community. Slow but I'm making progress.

Please share these items with your review team.

I also resurrected the old SCDHEC human health review document from 2005. Based on how the "Site" is now being managed after my departure I have genuine concerns about communications with the user public.

It appears the Foundation is substantially relaxing the advisories that I had in place over the last 14 year since the Preserve opened.

I will try to give you a call on Friday, but you are welcome to call me anytime.

Likewise, if your colleagues have any questions, please have them contact me.

Very best regards,

Dave

Dave Hargett, Ph.D.
